

GENERAL NOTES

1. This information is intended to provide general guidance on the installation of gas water heaters in single family residences. It summarizes information contained in the California Plumbing Code (C.P.C.) and the Building Code, but does not replace it. Manufacturer's installation instructions are an integral part of the installation requirements and shall be followed accordingly. If conditions are encountered that are not covered herein, the codes need to be consulted. Copies of the code can be reviewed in many libraries or at your local building department.
2. Most home improvement stores sell kits to anchor strap water heaters. These kits must be approved by the State of California, State Architect. This is demonstrated by the seal of the State Architect, which looks like a sea-shell with "ACCEPTABLE METHOD" written below. Install these kits per the manufacturer's instructions. Other methods which have been approved by the State Architect may be submitted to the Building Official for approval.

(See the notes on page 2 for additional information.)

WATER HEATER
